

You've been identified as a close contact of someone who has tested positive for COVID-19 or someone with **COVID-19 symptoms** and you work in a highest risk setting.* Now what?

*Highest risk settings include hospitals (including complex continuing care facilities and paramedic services) and congregate living settings, including Long-Term Care, retirement homes, First Nation elder care lodges, group homes, shelters, hospices, and correctional institutions.

Wear a well-fitted mask in public, physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should **NOT visit any highest risk settings* or individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days from your last exposure.
