

# COVID-19 – Eye Protection Guidelines

## When do school & child care staff need eye protection?

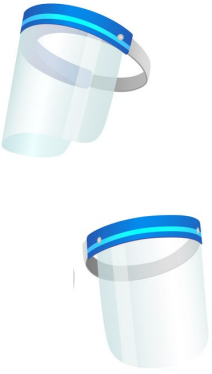

All school & child care staff, home child care providers, home child care visitors and placement students are required to wear a medical mask while inside. Eye protection (i.e., face shield or goggles) is required while inside, when working in close contact with an individual who is not wearing a properly fitted mask including in hallways and staff rooms.

The use of medical masks and eye protection is for the safety of school staff, child care staff/providers and the students/children in their care.

For more information, please review the Operational Guidance for [Schools](#) or for [Daycares](#).

**\*\*Eye protection DOES NOT replace the need for a face mask.**

## What type of eye protection?

Options	Considerations in selection
<p>Goggles</p> 	<ul style="list-style-type: none"><li>• <b>Goggles</b> with a snug fit around the eyes provide the most reliable eye protection from splashes, sprays, and respiratory droplets</li><li>• <b>Does NOT</b> provide protection for other parts of the face (i.e., nose, mouth).</li><li>• May be uncomfortable with prolonged use.</li><li>• Comes with an adjustable band to allow a firmly secured fit.</li></ul>
<p>Face shield</p> 	<ul style="list-style-type: none"><li>• <b>Face shields</b> cover the maximum area of the face to reduce exposure from splash, spray or droplets to both the eyes and face. Ensure that the face shields cover the front and sides of the face and extend to the chin to reduce the possibility of splash, spray or respiratory droplets from going around the edges of the shield.</li><li>• Easy to put on and take off.</li><li>• Prevents wearer from touching their face.</li><li>• A single-use face shield can be re-used by the SAME user until it becomes cracked or visibility is compromised. Label your face shield.</li><li>• Comes with an adjustable band to allow good fit around the head and snug fit against the forehead.</li><li>• <b>Does NOT</b> filter respiratory droplets – droplets can escape around the sides of the face shield.</li></ul>
<p>Safety glasses</p> 	<ul style="list-style-type: none"><li>• <b>Safety Glasses DO NOT</b> provide the same level of protection from splashes, sprays and respiratory droplets as goggles or face shields</li></ul>
<p>Prescription glasses</p> 	<ul style="list-style-type: none"><li>• Prescription eyewear, reading glasses and sunglasses will <b>NOT</b> provide adequate protection due to the openings around the side of the frames and <b>DO NOT</b> replace the need for eye protection.</li><li>• <b>If you wear prescription glasses</b>, use a face shield or goggles that fit snugly, with no gaps between the protective equipment and your face.</li></ul>

## Additional Tips

- **Do NOT** share with others.
- Eye protection should be worn over top of prescription eyeglasses.
- Clean and disinfect after every use.
- Ensure it does not interfere with the fit of your mask.
- When not being worn, store in a storage container or bag.
- Discard if damaged (e.g., scratched, pitted, broken, bent, ill-fitting, interferes with vision, no longer fasten securely to the provider).
- **If** there's a shortage, consider using safety glasses that fit snugly and covers the side of the eyes.

## Cleaning your eye protection

All eye protection should be cleaned and disinfected between uses.

When manufacturer instructions for cleaning and disinfection are unavailable, follow these steps:

1. Wear gloves.
2. Carefully wipe the inside, followed by the outside of the face shield or goggles using a clean cloth saturated with neutral detergent solution or a cleaner wipe. It can also be cleaned with water and soap.
3. Carefully wipe the outside of the protective eyewear with a healthcare grade disinfectant wipe.
4. Wipe the outside of face shield with clean water or alcohol to remove residue.
5. Fully dry (air dry or use clean absorbent towels).
6. Perform hand hygiene.
7. Allow eye protection to dry prior to next use. When dry, store in labelled paper or plastic bag.
8. Store in a designated clean area in a manner to prevent contamination.

## Putting on and taking off your face shield

ON – Putting on a eye protection (donning)	OFF – removing a eye protection (doffing)
<ol style="list-style-type: none"> <li>1. Wash your hands.</li> <li>2. Put on the face shield by holding the straps with both hands and placing the elastic band behind your head. Adjust it so that the foam rests on your forehead.</li> <li>3. Avoid touching the front of the face shield.</li> <li>4. Once on, check to make sure it covers the front and sides of your face and no areas are left uncovered.</li> <li>5. If you visor does not stay put, adjust the elastics on the side of the face shield.</li> <li>6. <b>Do not share it with others.</b></li> <li>7. If it gets dirty or difficult to see through, change your face covering for a new one.</li> </ol>	<ol style="list-style-type: none"> <li>1. Wash your hands</li> <li>2. Grab the strap at the temple and pull over your head. Avoid touching the front of the face shield.</li> <li>3. Avoid touching your eyes, nose and mouth when removing it.</li> <li>4. Place it into lined garbage bin (if disposable); or</li> <li>5. Place the used face shield into a bag or container to be transferred/ collected to an area where cleaning will occur.</li> <li>6. Wash your hands again.</li> </ol>
